yodopad control

Yodopad 26 mL
Box - 15 pieces

Yodopad - Control® is a solution which contains Iodophor or Yodopovacrix, served to prepare the patient's skin for surgery easily, with a practical application form and provides special care to the skin of the same.

Active principles:

Iodophor (0.7% free iodine), 74% isopropyl alcohol.

Combine two antimicrobial agents of broad-spectrum, alcohol for quick drying and the iodophor to a prolonged effect and formation of the water-insoluble film.

It is soluble in water but avoid its contact with it.

Glucoderm

500 mL

26 mL

3 mL

Solution with chlorhexidine gluconate 2% w/v isopropyl alcohol 70% with orange or pink ink, sterile and disposable container.

Used in the preparation of skin for medical procedures invasive as injections, insertion of intravascular catheters, major and minor surgery.

Glucoderm 26 mL Box - 16 pieces
Glucoderm 500 mL Box - 20 pieces

pleuramed.

Piece

Adult 2.100 mL and 2.500 mL
 Pediatric. 2.100 mL and 2.500 mL

Pleuramed equipment for drainage of pleural cavity for use in adult and pediatric, 3 chambers for water, suction and collection of liquid seal.

Chest drain Kit, consists of two chambers for the seal of water, regulation of suction and gathering of liquids, with a safety valve of high positive pressure and closing of negative pressure, with capacity of 2100 mL to 2500 mL

Cameras transparent and resistant to breakage by providing visualization of liquid inside the unit.

It is auxiliary in the drained fluid and/or air in the chest cavity or mediastinum.

flexmar

5cm x 7cm and 10cm x 12cm

Box - 50 pieces

Flexmar transparent dressing, micro-porous covers consisting of a film of polyurethane with acrylic adhesive. Film is fastened on a graph, and flexible support product sterilized by ethylene oxide.

Cover and protect points of puncture on catheters and wounds to keep damp environment in wound or to assist autolytic debridement, as secondary dressing, as protection for skins in second grade, and eye shield.

Do not use the dressing to replace sutures or other primary methods of wound healing.

hidroderm

Box

10 x 10 cm	15 pieces
15 x 16 cm	15 pieces
15 x 21 cm	25 pieces

Hidroderm Dressing extra thin hydrocolloid microporous, auto attachment, with or without external, sterile and disposable, layer made to base carboxy-methylcellulose.

Waterproof and flexible form.

It is a non-absorbable substance which absorbs water through the mediation of the sodium ion and increases volume.

In the treatment of the ulcers creates a humid and warm atmosphere, because of the gelling of the dressing and increased its volume by contact with the bed of the wound with own exudate, characterized by its change of color, odor caused by debridement lytic auto making during its maintenance in the lesion stimulate angiogenesis, keratinocyte proliferation and differentiation of the fibroblast.

Minimal dressing changes, can be placed up to 7 days, depending on the nature of the injury and the level of exudate.

APOs - Anti; antimicrobial absorbent apposite a sterile, non woven pad or Ribbon-shaped soft tencel and Ionic silver.

The silver contained in the dressing destroys a broad spectrum of bacteria in the wound and helps to create an anti-microbial environment.

This dressing absorbs large amounts of exudate and bacteria from the wound, forming a soft cohesive gel which adapts perfectly to the surface, keeping the moisture and helping to remove necrotic tissue.

The moist environment at the wound and control of the number of bacteria contribute to the healing process and help reduce the risk of infection.

STERILEX

Box
1L - 6 pieces

Sterilex, sterilizing solution cold 8-12.5% of glutaraldehyde, to prepare a dilution of final use of the 2 to 3.5%.

To be used in instrumental clean heat-sensitive and no organic material.

The solution of glutaraldehyde in the alkaline medium and ambient temperature, quickly reacts with the amino groups of proteins, denaturing them, reason why it is used as a broad-spectrum disinfectant.

Adult and Pediatric
Piece

Pigtail catheter
Piece

Mahurkar
Adult and Pediatric
Piece

Peritenck Catheter for dialysis peritoneal, chronic subcutaneous installation, with two polyester bearings Tecknoff .

Peritenck Catheter type pigtail for peritoneal dialysis, chronic subcutaneous installation, soft, silicone, with two bearings of polyester or dacron, connector, Plug and secure with radiopaque band.

Equipment for temporary hemodialysis type Mahurkar
Adult 11 to 12 Fr, curved extensions
Pediatric 8 to 10 Fr, curved extensions

Diunik

dispositivo intrauterino

Short and Standard

Box
50 Pieces

Diunik DIU 375: 375mm sterile polyethylene intrauterine device 2 , copper with flexible, curved and side arms.

CU 375 Short.

Contraceptive sterile polyethylene with 375 mm² of copper, with side, curved and flexible arms with 5 nodes of retaining each, giving a total width of 16 to 20.5 mm.

Strand of 20 to 25 cm in length.

Tube insertor with cervical cap.

CU 375 Standard.

Contraceptive sterile polyethylene with 375 mm² of copper, with side, curved and flexible arms with 5 nodes of retaining each one giving a total width of 16 to 20.5 mm.

Strand of 20 to 25 cm in length.

With tube insertor with cervical cap.

Planifem-T

dispositivo intrauterino

Box
50 Pieces

Planifem-T 380A IUD: "T" of 380 mm copper intrauterine device 2 plastic grade medical 77%, tube insertor, mountable applicator and long strand of 30 cm.

Consisting of:

Plastic t-shaped body

Monofilament

Two rings of copper.

Copper wire.

Cervical cap.

Bumper.

Plunger insertor.

Osto System

Box

Adult	10 pieces
Child	10 pieces
Neonatal	10 pieces
Equipment	4 pieces

Osto System® Colostomy or Ileostomy bag , self-adhesive, made of plastic medical grade, soft, transparent approves of smell, drainable. Shape of bottle with safety clip or locking mechanism, skin protection integrated with guide cutout to allow open hole of the stoma in different measures and internal face protector to avoid skin irritation.

Osto System® for colostomy or Ileostomy adult team, team composed of four bags of plastic medical grade, soft, transparent, smell, drainable, shaped-proof bottle of 30 x 15 cm open at its narrowest part, with collar 6-9 cm width and I ARGO 3.0 to 6.2 cm.

Tight Assembly for fascia system, allowing to insert an elastic belt, with security clip or latch mechanism.

MallaMed

Malla Quirúrgica.
